# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

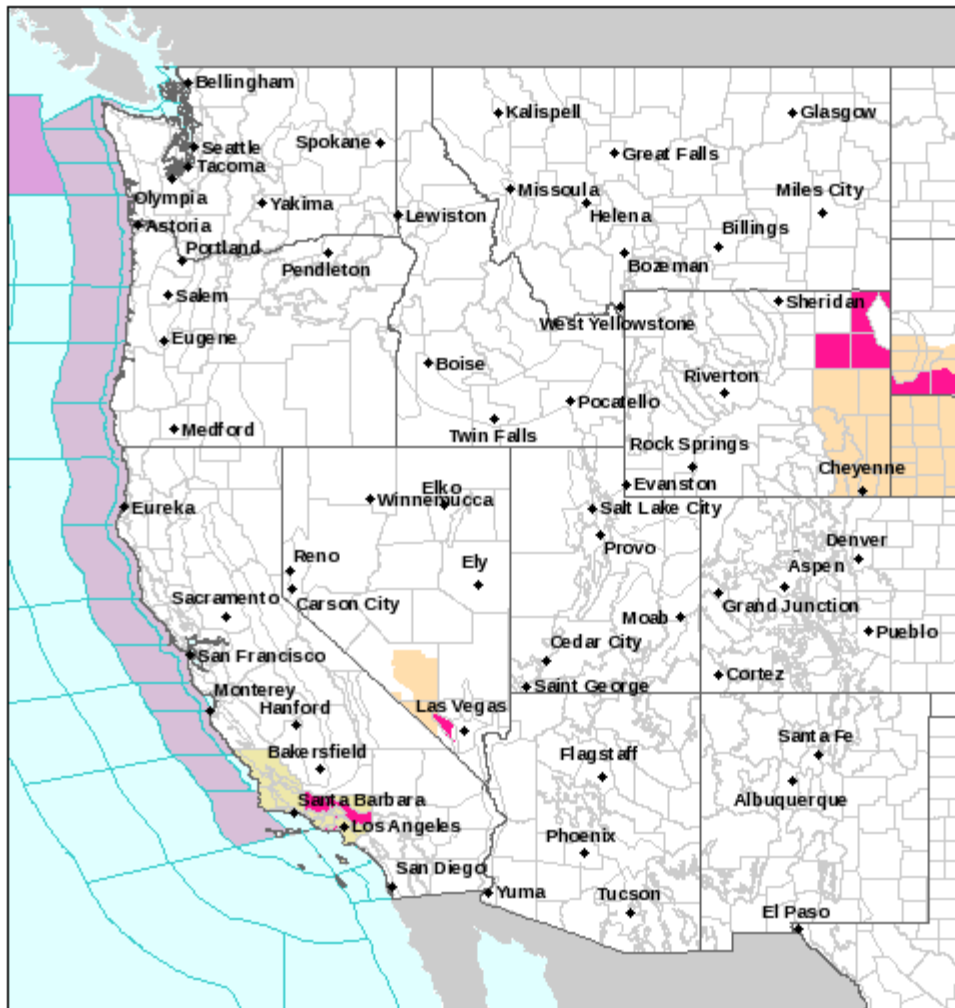

A low pressure trough in the eastern Pacific will produce mild, dry and mostly sunny conditions over most of the region through Saturday. The exception will be far northwestern areas where skies will be partly to mostly cloudy with a few light rain showers at times. On Sunday a stronger front will approach the coast. Afternoon south winds will gust to 35-45 mph in wind-prone areas like Weed. Light to moderate rain will reach the coast late in the day and spread inland overnight through early Tuesday. Mostly areas will see wetting rain from this system, with the exception of far eastern and southern areas. Snow levels will be 6000 feet or higher. The front and rain will pull back to the coastal areas late Tuesday through early Thursday, while other areas remain partly cloudy and breezy. On Thursday a Pacific low pressure system will approach central California and spread rain showers over most of the state by late in the day. Rain is likely to continue in region through next Saturday, with snow levels remaining above 6000 feet.

## **SOUTHERN CALIFORNIA**

The ridge of high pressure that has been over Southern California the past couple of days will move into the Desert Southwest today causing temperatures to remain well above normal, with 70s to low 80s across the mountains and mid 80s to mid 90s in the valleys. Minimum humidity will be mainly in the single digits across Southern California and in the teens across Central California today. Winds will be light today. A Pacific trough will drop down the West Coast bringing a cooling trend and an increase in humidity to the region Saturday through Monday. Scattered showers will move across Southern California Sunday and Monday, with less than a quarter inch of rainfall. Southerly winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes Saturday afternoon through Monday evening. A weak ridge of high pressure will build into the region from the south bringing a few degrees of warming and a little lower humidity to the region both Tuesday and Wednesday. A Pacific storm may move into the West Coast bringing significant rainfall and cool temperatures to the entire state late next week.
